DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 14-16 and 18-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 14 and 18 recites the limitation "the data words" in lines 9 and 8, respectively. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2663

4. Claims 17 and 26 rejected under 35 U.S.C. 102(e) as being anticipated by Russell et al (U.S. Patent 6,548,118).

Regarding to claims 17 and 26, Russell discloses a system for recovering encoded 8B/9B signals inserted into STM-N frames of synchronous digital hierarchy, comprising a mapper 400 (first demultiplexer) to form at least one first signal sequence (Fig. 4 and 8 col. 8 lines 39-45); a demapper 401, coupled to said first demultiplexer, to form an 8B/9B signal (col. 11 lines 18-25) having a reduced data rate (Fig. 4 col. 7 lines 31-38); a second demultiplexer (implicitly shown), coupled to said demapper, to form data words and associated monitoring information (Fig. 8 col. 8 lines 45-52); and an encoder (implicitly shown), coupled to said second demultiplexer, to form an Ethernet signal (col. 8 lines 52-54).

Allowable Subject Matter

5. Claims 14-16 and 18-19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
6. Claims 20-25 are allowed.

Response to Arguments

7. Applicant's arguments filed July 12, 2004 have been fully considered but they are not persuasive. Regarding to Applicant's argument on page 7 with respect to claims 17 and 26, Russell fails to teach the ability to recover an encoded 8B/9B signals. In response, on Fig. 12 col. 12 lines 6-20, Russell discloses of such limitation, wherein a 9B signal is converted into an 8B signal.
